President Garfield, in his addresss at Chautauqua, August, 1880, said:

You are struggling with one of the two great problems of civilization. The first one is a very old struggle; it is, "How shall we get leisure?" That is the problem of every hammer-stroke, of every blow that labor has struck since the foundation of the world. The fight for bread is the first great primal fight, and it is so absorbing a struggle that until one conquers it somewhat, he at Chautauqua, August, 1880, said: ince the foundation of the first great primaring in the foundation of the first great primaring in the foundation of the foundation of the fight to be a struggle of the can have no leisure whatever. So that we may divide the whole struggle of the human race into two chapters—first, the fight to get leisure; and then comes the second fight of civilization: What shall we do with our leisure when we get it? Now leisure is a dreadfully bad thing unless it is well used. A man with a fortune ready made, and with leisure on his hands, is likely to get sick of the world, sick of himself, tired of life, and become a useless, wasted man. What shall you do with your leisure? I understand that Chautauqua is trying to answer that question, and to open out fields of thought, to open out energies, a largeness of mind, a culture in the better sense, with the varnish scratched off, as Brother Kirkwood says. We are getting over the business of varnishing our native woods and painting them. We are getting down to the real grain, and find-

The sentiments uttered by the Santa Barbara speakers were sound, elevated, thoughtful and true, and they commend themselves to every lover of his country who the rate of over \$20,000 worth or at the rate of over \$20,000 worth particular to a good class of people, most of whom have been men of means. But few sales were made in faults nor shut his eyes to the dangers time for improvement this summer, but which beset her career. We make room for the closing paragraphs of the Judge Fernald's speech :

Two hundred years ago Algernon Sydney said: "Nations have a right to make their own laws and to constitute their own magistrates, and such as are constituted owe an account of

the their own magnistrates, and such as are constituted owe an account of their actions to those by whom and for whom they were elected."

This is the fundamental principle of our declaration, and our republic as the development of this political philosophy. This principle implies in the development of this political philosophy. This principle implies in the development of this political philosophy. This principle implies a third in the development of this political philosophy. This principle implies a third is a survive as long as we are worthy of it, and no longer.

It will survive as long as we are worthy of it, and no longer.

Unpunished crime, violation of rights of property, corruption in public office, and communism are used as arguments in favor of despotism, which is but the unifying of all these crimes in one and calling it "The State."

It is now time to add a new paragraph to our declaration to meet a new emergency. It is time now to say to the temperature of the property of the Republic: As you have left your native land, so leave your political conspiracies, nor is it to be made the battle ground upon which to settle your foreign issues.

And yet another. The political power of the republic shall not be delegated to, nor its domain and legitimate revenues squandered on private corporations, giving them the means of controlling State and National

mate revenues squandered on private corporations, giving them the means of controlling State and National gowernments. Do this; make life and property secure; punish crime, make peculation in office high treason, and doubting, covert imperialism will wait in vain to see the failure of the Republic in America.

From Judge Hall's admirable oration we quote the following bold and timely utterances:

We must remember we have barely passed the first century mile-stone of our national existence. Nations before us have risen to power and dominion with equal, if not with greater rapidity, and have maintained their supremacy longer than has our young republic, but which are now known only in the annals of history.

Revolutions, the rise and fall of nations and empires, have ever formed

tions and empires, have ever formed the great chain and current of tradition and history. And in this connection there are two significant facts it is well we bear in mind and consider:

San Francisco, July 7. Best & Belcher, 425; Chollar, 3 50; Con. Virginia, 45c; Crown Point, 1 40; Eureka, 5 25; Gould & Curry, 2 45!; Hale & Norcross, 574; Mexican, 3 05; Northern Belle, 6%; Ophir, 2 55; Potosi, 1½; Savage, 195; Sierra Newada, 4 15; Union Con., 5; Yellow Jacket, 3 75.

First, that it has never been the for tune of nations attaining great power and dominion to long maintain their supremacy, or even national existence And secondly, that the downfall and destruction of such governments and nations have ever been because of indestruction of such governments and nations have ever been because of internal dissensions, vices and corruptions, and not from powers or combinations from without. And with all our attainments, with all that of which we are now so justly proud, we find remaining germs of evil which tend to we are now so justly proud, we find remaining germs of evil which tend to injustice, oppression and corruption, and if not eradicated, finally to disaster and destruction. Corrupt rings and combinations for political purposes are not only organized, and operated, but because of an over-lax public sentiment, are to a lamentable extent tolerated. High and responsible positions of trust and confidence are purchased by corrupt bargains or by the direct use of money or its equivalent, and the successful are lauded and feted irrespective of the means by which they have attained position.

Power and place are purchased in the market, and the price paid is reimbursed by official peculations and frauds.

The unwary and confiding voter is befogged and carried by the guile and power of party machinery, in the interest of demagogues, presented for their support through wiles and schemes to which the worthy and competent and their sapporters cannot descend.

For have not Dry Goods Houses for the last fifteen years kept millinery? Have not milliners kept fancy goods and dry goods? We say, Milliners you are right; try your best to smother the ember, but you are too late—it is already a living coal. When we opened the PEOPLES' STORE we promised the Los Angeles public goods at right prices. Have we not kept faith? Have we ot kept the double dealers down? Have we not made reductions in every line? We admit that n our Millinery Department we many times sell goods at too low a rate, but the milliners harge as much too high as we do too low. We wish to see everybody do well and prosper. We are pleased when others advance, but when such high-handed methods are taken to squelch the PEOPLES' STORE, we are compelled to fight. We are now done with the San Francisc market, and hereafter will draw our supplies from other quarters. HEALTH restored and life prolonged to suffering humanity, by the most wonderful curative agents ever discovered. I invite the sick, no matter what their diseases may be, to call and investigate for themselves before abandoning all hope, for it will cost you nothing. I give no encouragement unless there is a fair prospect of making a cure. I will endeavor to be candid in my opinion, and reasonable in my charges. I claim not to cure everybody, but to cure all that can be cured. I am formerly from New York city, and a graduate of one of the best medical colleges in the United States, and a most thorough Electrician, and have had many years successful practice in the treatment of both acute and chronic diseases. To remove all doubts and convince my patients that I claim nothing but what I am, I refer to my diploma and the numerous recommendations in my possession, which will always be ready for inspection at my office. I HAVE NO ONE CURE-ALL! nor of I make a hobby of any one mode of treatment. I use electricity or medicines or both, as cases may require. I find the cause of disease, remove it, and nature, assisted by medicinal remedies properly applied, will promote a cure without fail. TO THE LADIES. To the ladies I would say: You, whose suffering have become intelerable, and who have suffered a thousand deaths from those diseases so common to your sex, give me a call, for I GAN JURE YOU WITHOUT FAIL, and make your lives once again worth this of the property of the property of the powers have become imbose young men who are suffering from year to year, and whose vital powers have become imbose young men who are suffering from year to year, and whose vital powers have become imliving for.
